493,269.34 ACRES OF SELECTED FARM LAND

"All this drama of change and contrast (in Western Canada) has been a peaceful one, founded upon no greater conquest than that wrought by a simple plant with a bearded head, which will grow in some lands but not in others, and which seems to have a way of empire about it—the wheat plant, closely intermixed with war and famine, with ocean steamer lines and colonial policies, with Wall street fluctuations, and national bank reserves."—*Emerson Hough, in "Outing."*

WHERE ONCE THE BUFFALO ROAMED.

THE SASKATOON & WESTERN LAND COMPANY LIMITED.

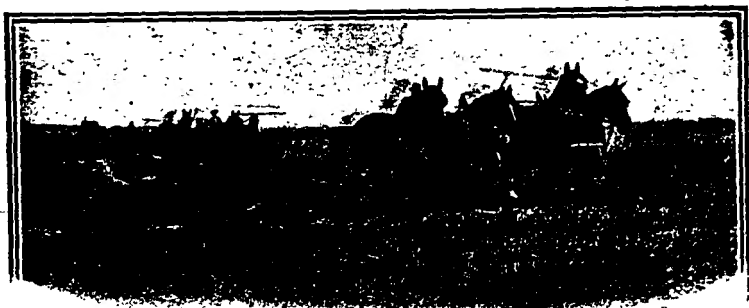

THE resources and the prosperity of Western Canada are today established facts. The wonderful resources have been advertised by a succession of good harvests, and annual floods of golden wheat. The great prosperity, and the confidence which large capitalists have in the future of the country are reflected by the progress of the City of Winnipeg, which is today growing faster than any other city of the same size on the Continent, and the many millions of dollars being spent by the Canadian Pacific, Canadian Northern, Grand Trunk Pacific, and Great Northern Railways, the large milling companies, and by many other corporations and private individuals engaged in large enterprises. These millions are being invested by some of the leading financiers of the world—shrewd, far-seeing men who know how, when and where to invest. They are building for the future, and are preparing for an enormous development.

This booklet will be confined to that section of Western Canada known as the famous Saskatchewan Wheat Belt, in the heart of which the lands of The Saskatoon & Western Land Company, Limited, are situate.

PROVINCE OF SASKATCHEWAN.

Saskatchewan, situate as it is in the sphere of both the Commercial East and West, blest with all that is necessary to health, happiness and prosperity, is one vast alluvial plain, sloping from east to west, with a slight tilt to the north. It is watered and drained by the Saskatchewan and Qu'Appelle water sheds, and numerous lakes are found throughout the Province.

BINDING.

The North and South Saskatchewan and Qu'Appelle Rivers, with their many tributaries, divide this land into a vast network of intersecting valleys, gently undulating, with sufficient slope for drainage. This topographical feature, together with the mild climate, the even and light precipitation, a perfect soil, and the long hours of sunshine during the period of growth, are the basis of the real wealth in the West, and account for the remarkable productiveness and fabulous resources that are so rapidly bringing Saskatchewan to the front.

The encouraging developments following cultivation have, in a few years, transformed Saskatchewan into the most valuable wheat producing section in Canada. "THE HOME OF THE CEREAL." The average yield is from 19 to 27 bushels of wheat to the acre, and in some places it has reached as high as 60 bushels to the acre.

SOIL.

The soil consists of from one to three feet of black vegetable mould, being the alluvial and vegetable accumulations of centuries. It is mostly of a warm, mellow, loamy character, and for the most part with clay subsoil. It is easily worked, and is rich in nitrogen, phosphoric acid and potash—the foods

of the cereal. The value of the soil can only be estimated by its productive power. Professor Tanner, the great English agricultural chemist, wrote:—

"Although we have hitherto considered the black earth of Central Russia the richest soil in the world, that land has to yield its distinguished position to the rich, deep, fertile soil of Western Canada. Here it is that the most fertile soil of the world is to be found. These soils are rich, vegetable humus, or clay loam with good clay subsoil. The surface deposit is rich in nitrogen, phosphoric acid, potash, and all other chemical ingredients that go to make up a perfect soil. To the high percentage of nitrogen is due the high percentage of gluten, which gives "Canadian No. 1 Hard" the flouring qualities which have spread its fame abroad to the end of the earth."

CLIMATE.

Saskatchewan, with its pure and healthful air, has an exceedingly attractive climate.

WINTER starts about the middle of November. It is cool, but dry and perfectly healthful. The days are bright and the air exhilarating. There are occasional abnormal spells of cold weather, but they seldom continue for more than two or three days.

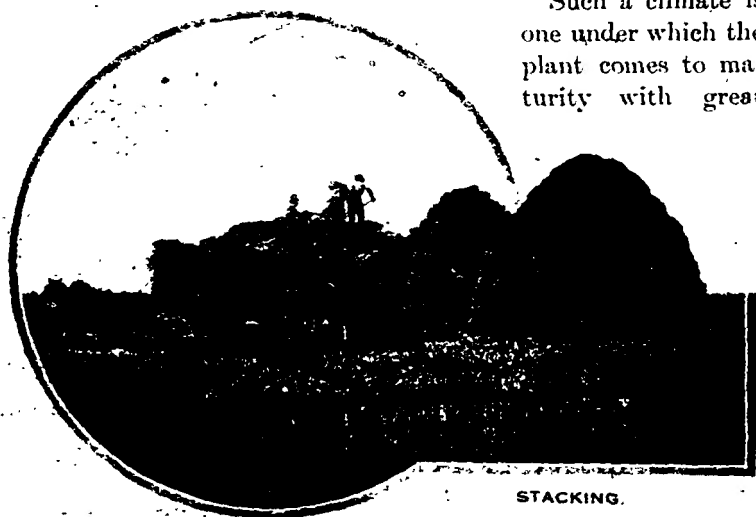

PLOUGHING.

SPRING comes early and suddenly, breaking almost into summer during the month of April.

SUMMER—The summer days are warm, and on account of the northern latitude, the hours of sunshine are long, ripening the crops quickly. The nights are cool, causing heavy and beneficial dews which protect the grain even in the driest seasons. Three or four feet of frost that penetrates the earth during the winter constitutes a vast natural irrigation system, which gradually thaws throughout the growing months, nourishing the plant and rendering it less dependent upon rain.

Such a climate is one under which the plant comes to maturity with great

STACKING.

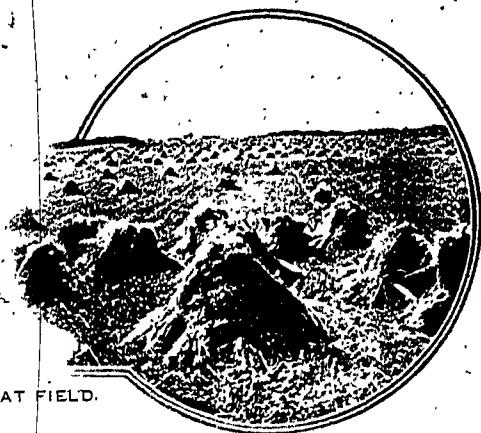

rapidity. It is of inestimable value to agriculture, and is one of the principal explanations of the supremacy in grain production. It also prevents the rapid decay and transformation of vegetable matter in the soil, thus checking waste in the hands of nature.

RAINFALL.

The average rainfall is about eighteen inches; an even and relatively high precipitation; sufficient to grow good crops

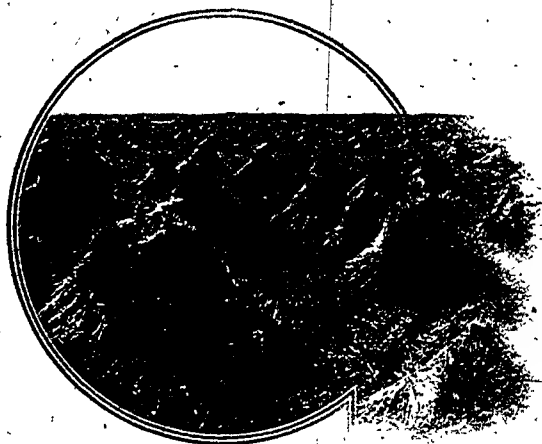

when the soil is properly tilled, and not destroyed, them when grown. It is mostly absorbed, and does not impoverish the fertility of the soil by cracking or erosion.

AN OAT FIELD.

CROPS

Wheat is the great staple of the West, and in Saskatchewan is grown the finest Hard Wheat in the world. Mixed farming is also very profitable. Besides wheat, the soil will produce anything which will grow in a temperate climate:—Barley, oats, rye, millet, hay, flax, potatoes, peas, beans, corn, buckwheat, beets, carrots, squash, cabbage, celery, turnips, etc.

A WHEAT FIELD.

Seeding usually begins during the first part of April, and in about ninety days the crop matures.

The following table shows the average yield of wheat, oats and barley,

in bushels per acre, of the Western Provinces as compared with some of the principal North Central States in 1905:—

	Wheat.	Oats.	Barley.
SASKATCHEWAN	23.09	42.70	27.11
Alberta	21.46	39.18	27.36
Manitoba	21.07	42.60	34.20
Wisconsin	15.80	39.00	29.90
Kansas	14.10	27.10	22.00
Nebraska	14.00	31.00	27.50
The Dakotas	13.90	39.00	29.00
Iowa	13.80	35.00	28.00
Minnesota	13.30	37.50	27.00

The crop reports for Western Canada for 1906 show:—

90,000,000 bushels Wheat
 70,000,000 bushels Oats
 17,000,000 bushels Barley

which means that the value of the grain crop for 1906 is upwards of \$100,000,000.

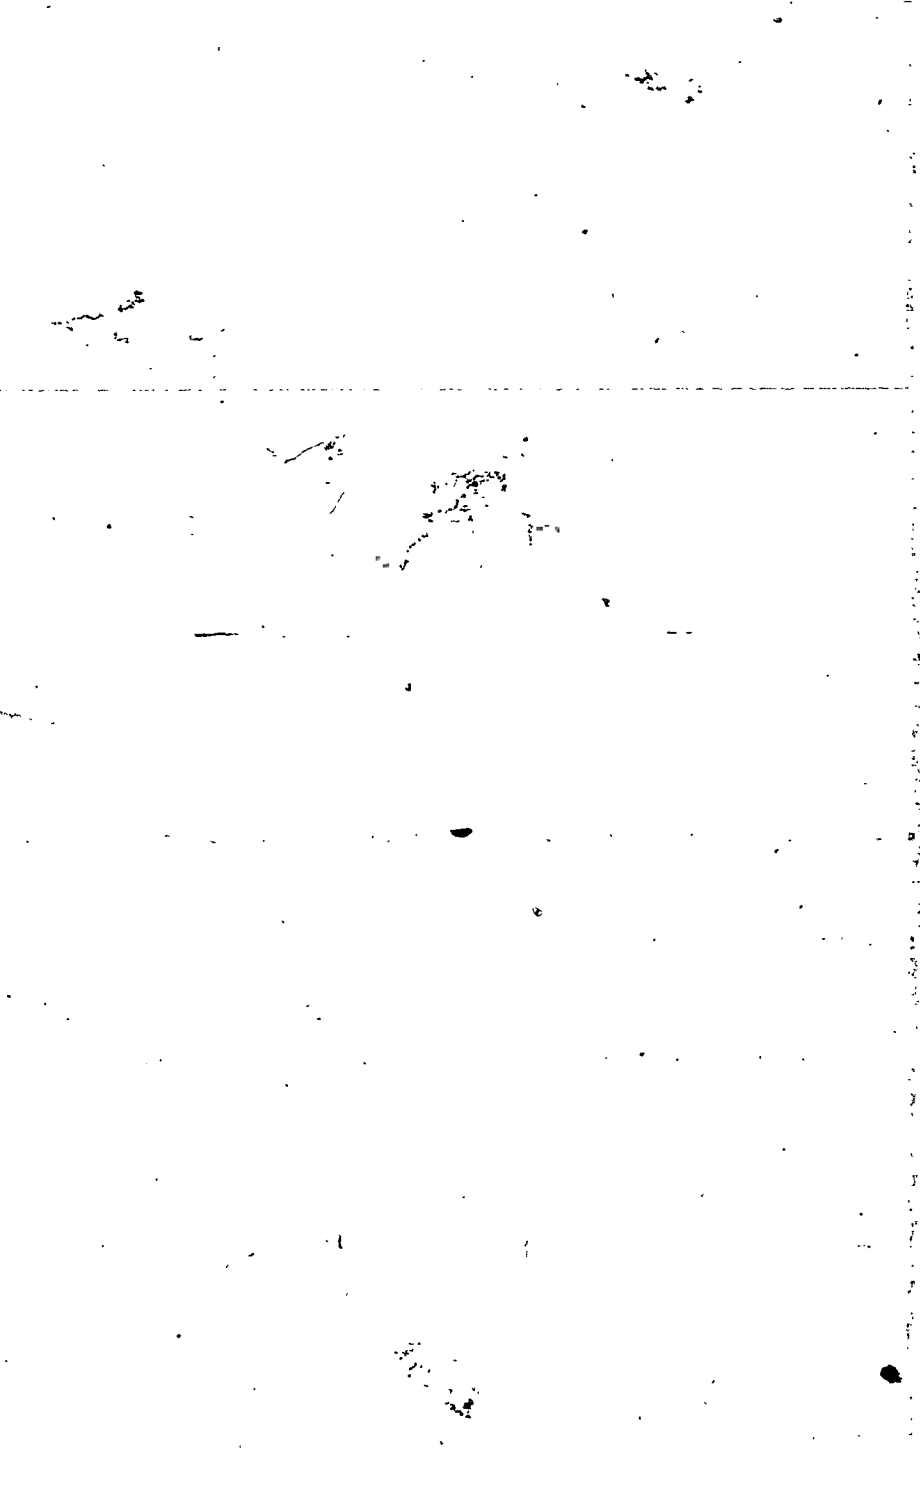

Horses, cattle, sheep and hogs thrive on the rich and nutritious pastures of wild hay and prairie grass. These grasses mostly form in tufts, and make good fodder during both the winter and summer.

THE FAMOUS SASKATCHEWAN WHEAT BELT.

A few years ago the lands around Regina were practically unsaleable. Today they are changing hands at prices ranging from \$20 to \$50 per acre. Development of the surrounding country has brought about this change. This same

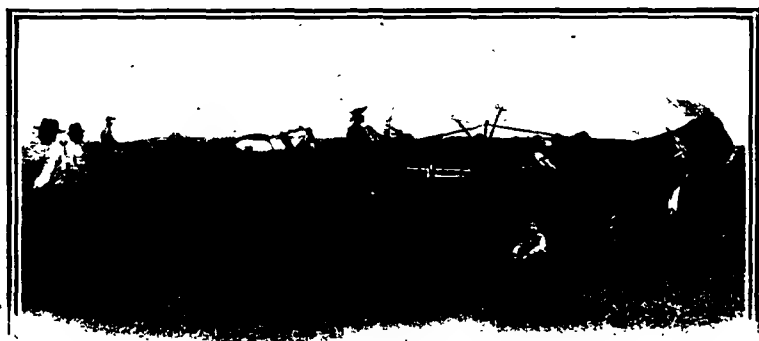

SHOULDER DEEP IN WHEAT. FIFTY BUSHELS TO THE ACRE

development is going on today in the territory north of Regina, in which the lands of The Saskatoon & Western Land Company, Limited, are situate; the result being the opening up of a wonderful country in Saskatchewan, beginning about twenty-five miles north of Regina and extending about fifteen miles north of Prince Albert.

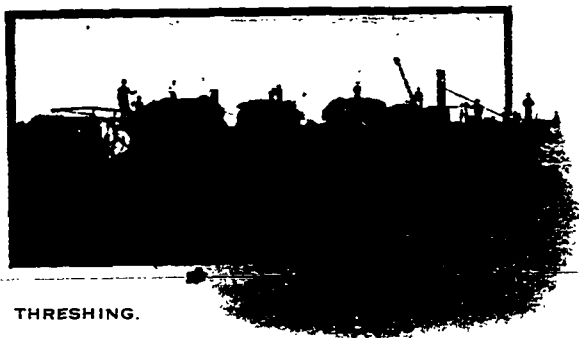

The farmers in this district started under most discouraging conditions. To-day they are reaping abundant harvests, and their farms have greatly increased in value. -- Lands which were simply uncultivated prairie three or four years ago, and could

A HARVEST SCENE

be had for little more than the asking, are today worth from \$12 to \$25 an acre. On every side can be seen beautiful farms, comfortable homes, thriving cities and towns, and evidences of general prosperity. Railways have taken the places of the old buffalo and Indian trails, and soon there will be but few farm lands distant more than twelve or fifteen miles from a railway. Conversation with the farmers is all that is necessary to convince the most pessimistic of the splendid opportunities afforded by the New West.

The bountiful crops, the great prosperity, and the contentment and success of the tillers of the soil in this new area are gen-

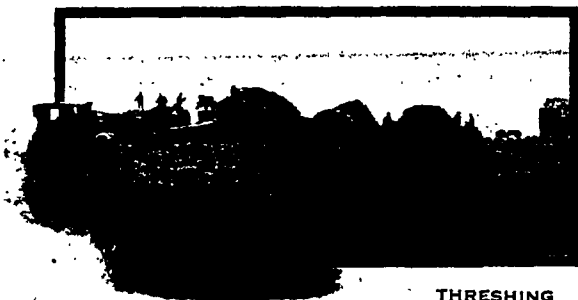

THRESHING.

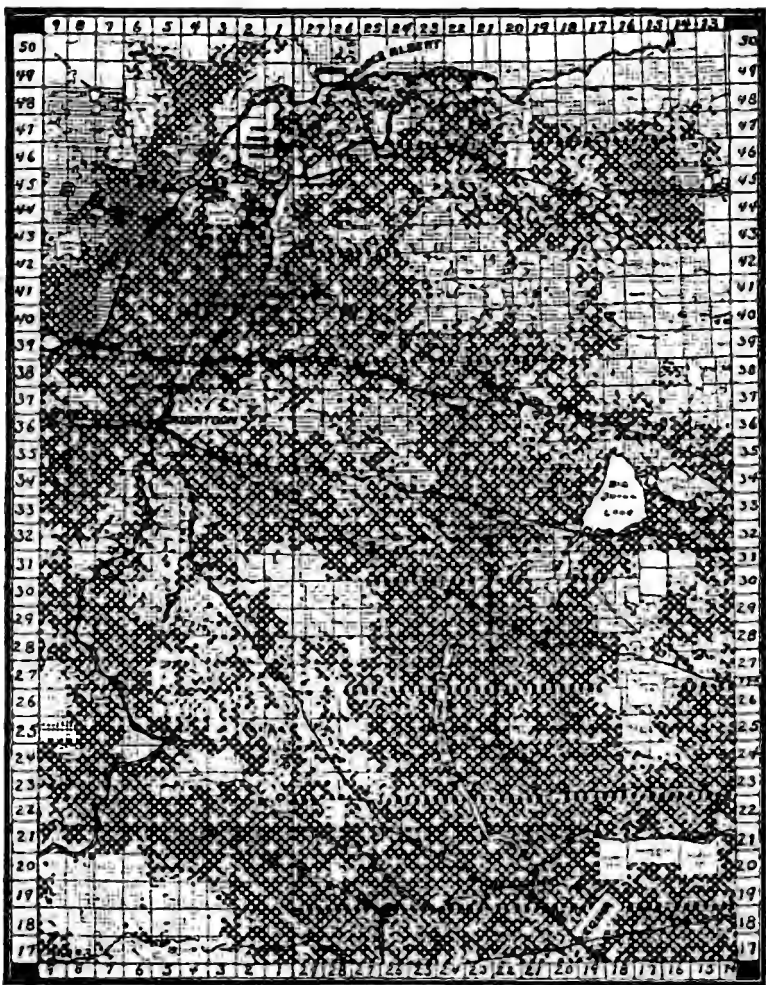

erally known. These, together with the fact that the best land on the American continent could be had there as free homesteads or at reasonable prices, have brought

thousands of farmers from all parts of the world, and thousands more are arriving every month. Settlers are pouring in, eagerly seeking for lands, and Saskatchewan is developing more rapidly than any other part of Canada. The country has been settled so rapidly that, in order to get desirable homesteads or farms, settlers must now either go far back into the unsettled country or purchase lands in the settled districts. It is safe to say that there are very few vacant homesteads in this district, and that all the other good lands are under cultivation, or are being held by companies for investment or speculative purposes. This will be borne out by referring to the homestead map on the opposite page, and by the following extracts from the *Manitoba Free Press*:—

E. H. NEVILLE,
MAY 18th, 1906.
—"While out West recently I met a number of people looking for homesteads, but there appeared to be very few, and I predict that at

THRESHING.

MAP showing the number of homesteaders that have located in the Heart of the Saskatchewan Wheat Belt in the past three or four years. Each full square (■) includes four homesteads. The homesteads are confined to the even numbered sections, and besides those shown above, there are thousands of settlers in this district who have purchased lands in the odd numbered sections. This map was compiled from the records of the Department of the Interior, Ottawa, Canada. By comparing the Company's map with the above, it will readily be seen how carefully the lands of The Saskatoon & Western Land Company, Limited, were selected and how well they are located.

DELIVERING WHEAT TO THE ELEVATORS.

the end of this year there will not be a homestead left in the noted Saskatchewan Wheat Belt. Most of the settlers have only been on the land for one or two years, and all seem perfectly satisfied with the country."

MAY 5th, 1906.—"Battleford, Sask., holds the record for the number of homestead entries made at any Dominion land office during the month of April, securing the splendid total of 1,615. The rush has kept up steadily, and the staff has been worked night and day. At four o'clock every morning the crowd of homeseekers begins to congregate, and as soon as the doors open at nine o'clock an eager and anxious crowd at once floods the office. Two or three men and the assistant land agent have been carried out in a fainting condition. During the month the floor of the office had to be braced up from below to prevent it from caving in. The correspondence is heavy, about six thousand letters having been received during the month."

In June, 1906, Regina made 1,796 homestead entries.

MAY 15th, 1906.—"Large parties of homeseekers and land seekers are crowding Prince Albert, arriving on every train. The Secretary of the Board of Trade is kept busy attending to the wants of strangers for information, and is fairly inundated with a mass of correspondence from intending settlers."

During the fiscal year ending June 30th, 1906, the total number of homestead entries in all of Canada was 41,869, representing 6,699,040 acres. The nationalities of the homesteaders were as follows:—

British	8,097	Swedes	589
Americans	13,188	Russians	534
Canadians	14,629	Norwegians	431
Austro-Hungarians	2,193	French	317
Germans	1,024	Other Nationalities	867

During the year 1906, 42,012 homestead entries were made.

The amount of land sold by the principal railway land companies, operating in Western Canada, during the fiscal year ending June 30th, 1906, was as follows:—

Great North-West Central Railway Co.....	20,003 acres
Manitoba South-Western Colonization Railway Co.,	83,418 "
Calgary & Edmonton Railway Co.,	85,784 "
Canadian Northern Railway Co.,	204,966 "
Hudson's Bay Company,	236,191 "
Canadian Pacific Railway Company.....	1,012,322 "
Total.....	1,642,684 acres

In addition to the above, the Government sold about 250,000 acres, and thousands of acres were sold by the various land companies.

The following table shows the constant increase in immigration during the ten years ending June 30th, 1906:—

Year.	Great Britain and Ireland.	Other Countries.	United States.	Total.
1896-7	11,383	7,921	2,412	21,716
1897-8	11,173	11,608	9,119	31,900
1898-9	10,660	21,938	11,945	44,543
1899-00	5,141	10,211	8,543	23,895
1900-01	11,810	19,352	17,947	49,109
1901-02	17,259	23,732	26,388	67,379
1902-03	41,792	37,089	49,473	128,364
1903-04	50,374	34,785	45,171	130,330
1904-05	65,359	37,255	43,652	146,266
1905-06	86,798	44,319	57,919	189,036
TOTAL.	311,747	248,250	272,809	832,606

* Arrivals for six months only.

The immigration into Canada during the calendar year of 1906 was 215,912:

The future policy of the Government will be to do all possible to increase immigration.

"THE LAST STAMPEDE FOR CHEAP HOMES."

BY EMERSON HOUGH.

"Now, what is this new country regarding which most of us have lived in partial ignorance? If it has been there, why have we not heard of it? No seas divide us, no mountain barriers, yet the world has lived for two centuries as ignorant of this far North-west as though a wall, mountains high, had separated it from all the rest of the world. That wall did exist, but it was a wall of mystery and misrepresentation. In truth, it was largely erected by that unique and picturesque monopoly, The Hudson's Bay Company, which wanted a wilderness and got it at a time of Homeric ignorance and apathy."

"The Hudson's Bay Company did not want the free trader or the rancher, yet in turn these came. The farmer was kept out by deliberate propaganda, but he came."

"So thither, silently at first, now with shuffle and murmur and dust-cloud of many feet, go the people of the world on the last Great Trek; and if this is not a great and significant thing, then you and I have never seen one. The trek leads to a new home for humanity, a new land of opportunity and fair play."

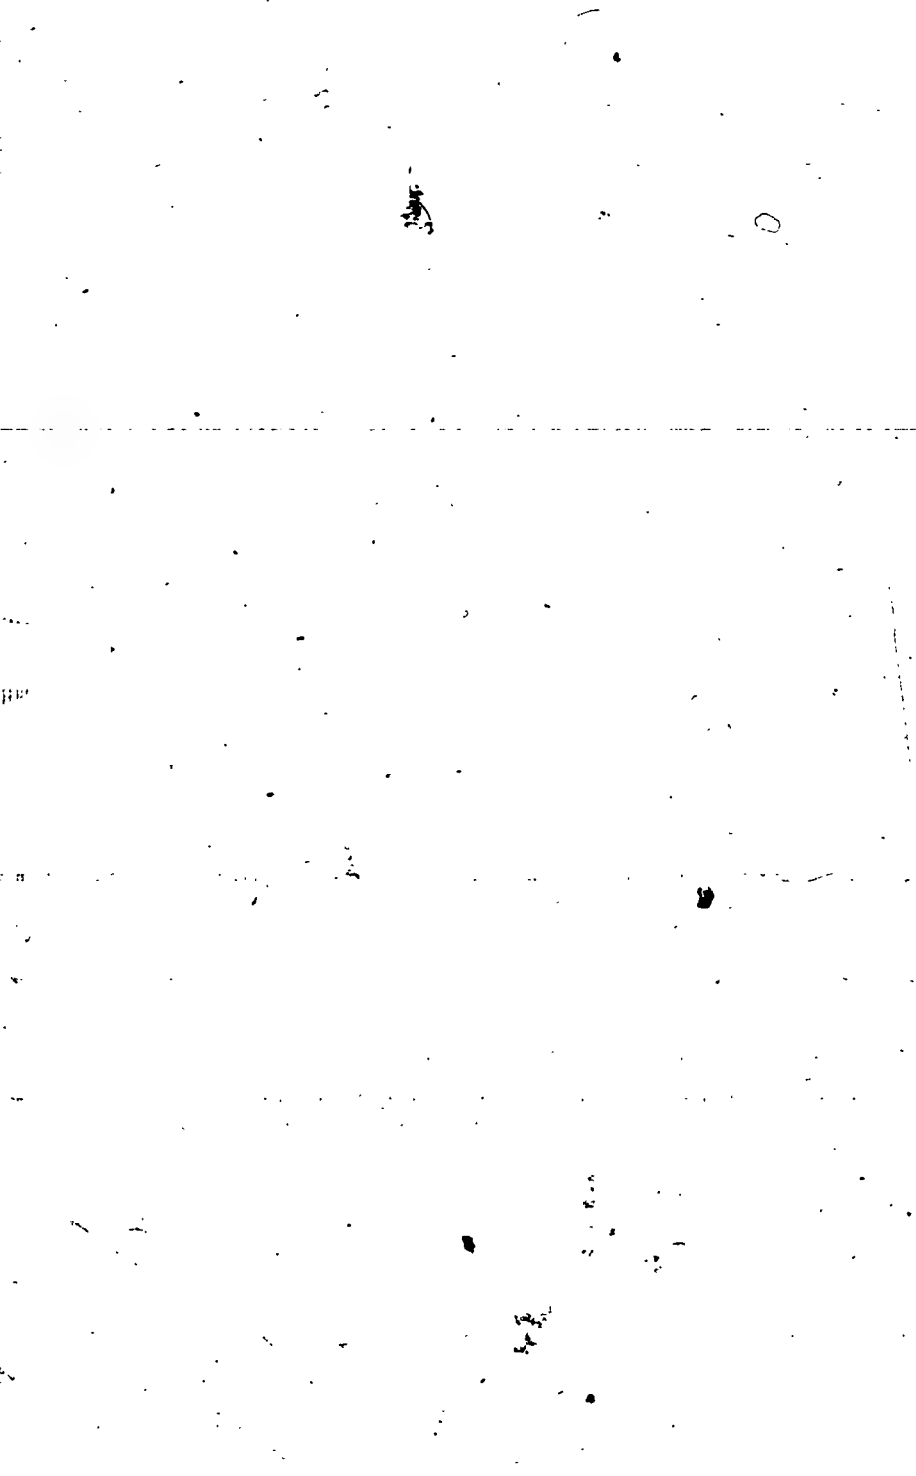

In speaking of one of the transcontinental railways, Mr. Hough says it "sweeps through a continual succession of fading misconceptions. It is taking thousands and thousands of settlers into regions not long ago thought ice-bound throughout the year. The truth is astounding. From the foot of the Winnipeg Lake, 825 miles north-west to Edmonton, lies absolutely the greatest continuous wheat belt of the entire world. Siberia does not equal it, nor New Zealand, nor Australia, nor our own West (United States). It raises the hard Fyfe wheat, the "No. 1 Hard" of the miller's dream. The amount? About twice as much as North Dakota at her best per acre."

"What shall we do with facts like these? What is such land worth—this ice land re-bought and salvaged out of mystery? No one knows. It is as much worth forty dollars as ten. Perhaps the latter figure is the average price today. It will be fifteen flat next year. Three years ago, two years ago, eighteen months ago, it was three dollars, two, one dollar an acre. How much has Prince Rupert's Land (the old name of Western Canada) enhanced in value in the last five years? Tenfold! Once it fetched 'two elks and two black beavers.'"

"The Province of Saskatchewan as first established contained two hundred and seventy-five thousand square miles. Since 1897 homestead entries have increased eighteen hundred per cent. in that Province. Since 1902 twelve million acres have been homesteaded. Since 1885 the Canadian Pacific Railway alone has sold over five million acres to settlers. Twenty-five years ago there was not a mile of railway in Alberta and Saskatchewan. The mileage today is changing too rapidly to be obtainable; it is perhaps around ten thousand miles. Four years ago there was only one incorporated city in the Canadian North-West. Land sells today at thirty dollars which five years ago was bought at one dollar an acre, one-fifth paid down."

A FAMILIAR SCENE ON A SASKATCHEWAN FARM.

THE SASKATOON & WESTERN LAND COMPANY, LIMITED.

The Saskatoon & Western Land Company, Limited, has for sale 493,269.34 acres of unbroken land in the district between Regina and Prince Albert, in the HEART OF THE WORLD-RENOVED SASKATCHEWAN WHEAT BELT. The parties from whom this Company purchased these lands held the right of title to them since 1889, long before a single acre in the district was ever ploughed. The 493,269.34 acres were selected from a reserve of about 3,000,000 acres, by practical men of long experience in the West, and with the utmost care as to quality of soil, topography, and relative positions to towns and railways.

THRESHING FROM
THE STOOKS.

Only the very best lands available were selected. (See letters from Land Examiners; pages 54, 55 and 56.) These lands, and their relative positions to towns and railways, will be seen by referring to the Company's list and map herewith. The map will show that the lands are not in blocks, but are widely scattered, the reason for this being, as already stated, that only the very best of the available lands were selected. If the Company's lands were in block, they would represent an area about twenty-eight miles square.

A striking feature in connection with this Company's lands is that most of them are now, and in the near future all will be, within easy access of one or more of the three great Canadian Trunk Lines of Railway—each with its own equipment,

its own lake and ocean termini, and its own through traffic arrangements.

The following will show that about sixty per cent. of the Company's lands are within ten miles of railways in operation

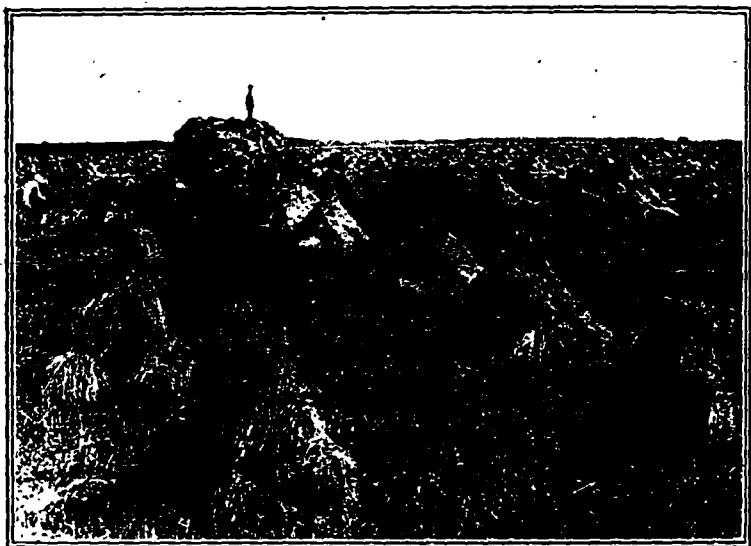

STOCK RAISING IN WESTERN CANADA

or actually under construction, and when the Moose Jaw extension of the C. P. R. and the Prince Albert-Battleford line of the C. N. R. are completed, only a very small percentage of this Company's lands will be more than ten or twelve miles from a railway.

LOCATION.	MILES FROM A RAILWAY STATION.		
	Not more than five.	Over five and not more than ten.	More than ten.
	ACRES.	ACRES.	ACRES.
Along Pheasant Hills branch of the C. P. R.:			
Lipton, Dysart, Cupar, Markinch, Southey,	19,680	19,680	5,120
Earl Grey, Bulyea, Strassburg, Duval, Govan, Nokomis, Lockwood, Lanigan Junction, Guernsey, Plunkett and Viscount	44,480	55,840	23,040 Note 1
Along C. P. R., Yorkton Extension to Lanigan Junction,	3,200	3,840	4,160
Along main line of Grand Trunk Pacific Railway,	33,920	23,040	9,600
Along Regina-Prince Albert line of C. N. R.:			
Craven, Findlater, Chamberlain, Aylesbury, Craik, Girvin,	4,800	11,840	51,830 Note 2
Davidson, Bladworth, Kenaston,	13,800	18,920	61,840 Note 2
Hanley, Dundurn,	7,040	6,040	
Osler, Hague,	320	4,480	1,600
Duck Lake, Rosthern,			11,000 In the Blaine L. District
Prince Albert,	1,280		26,630 In the Shellbrook District
Along main line of C. N. R.:			
Dalmeny, Warnian, Vonda, Howell, Dana, Bruno, Carmel, Humboldt, Muenster,	8,960	16,640	640
TOTAL (about)	137,480	160,320	195,400

NOTE 1.—Most of these lands are equi-distant from the main line of the C. N. R. and the C. P. R. main line to Saskatoon, none of them being over fifteen miles from a railway station.

NOTE 2.—According to the latest available information regarding the location of the C. P. R. Moose Jaw branch, it will run through about the middle of the district in which these lands are situate.

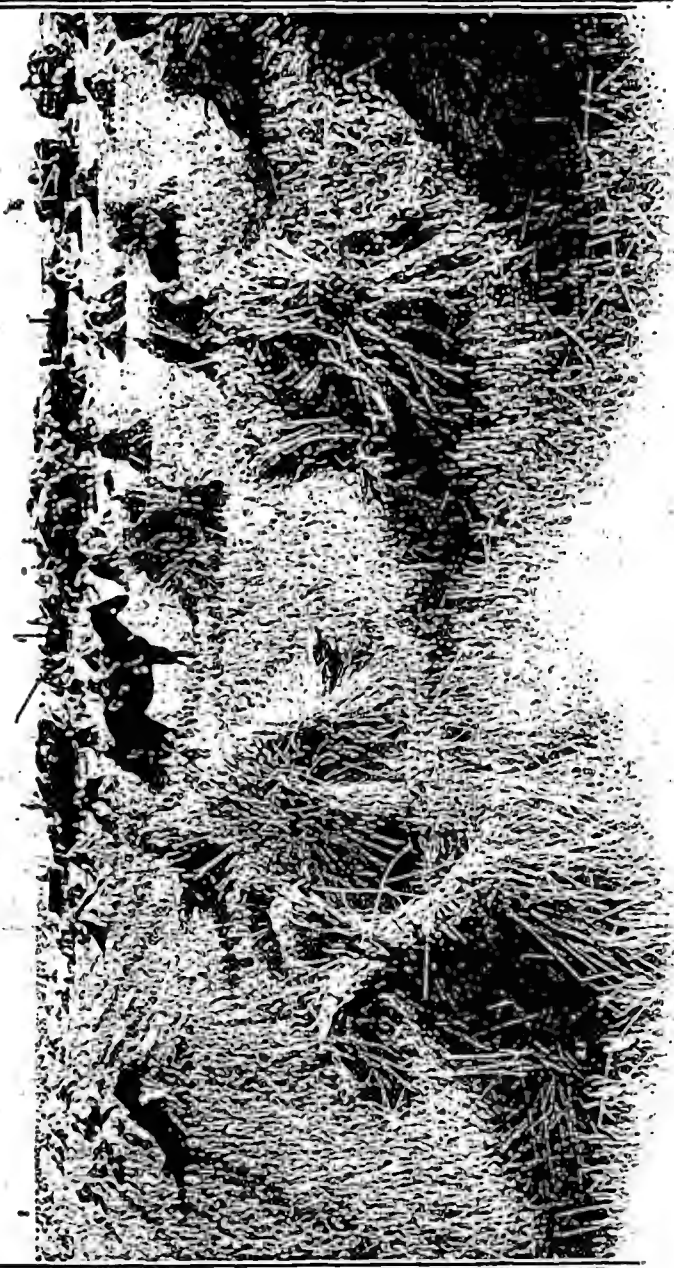

REMOVING THE STOCKS

VALUE OF UNBROKEN LANDS.

Selected unbroken lands throughout the entire area are at present being sold or held by the various land companies and their sub-companies at prices ranging from \$10 to \$25 an acre. Many of their lands adjoin, or are close to, the lands of The Saskatoon & Western Land Company, Limited. The following are the prices asked by four of the other leading land companies operating in Saskatchewan:—

	Price Per Acre.
Canadian Pacific Railway Co.....	\$10 to \$25
The Hudson's Bay Company,.....	12 to 20
The William Pearson Company,	12 to 20
Saskatchewan Valley & Alberta Land Company,...	\$10 and upwards

A TYPICAL THRESHING SCENE

11/11/11

11/11/11

11/11/11

At a sale of school lands held at Strassburg, Sask., on October 12th, 1906, eleven thousand eight hundred and one acres throughout the district were sold at an average of \$14.55 an acre. Some of the lands sold as high as \$30.50 an acre. A few quarter sections of inferior land sold at from \$9 to \$10 an acre. The general price, however, was from \$12 to \$16 an acre. During the fiscal year 1905-6, 26,662.93 acres of Saskatchewan school lands were sold, and averaged \$14.34 per acre. It will be remembered that school lands are not selected as were the lands of this Company, but consist of two defined sections (11 and 29) in each township.

COMPARATIVE WHEAT LAND PRICES.

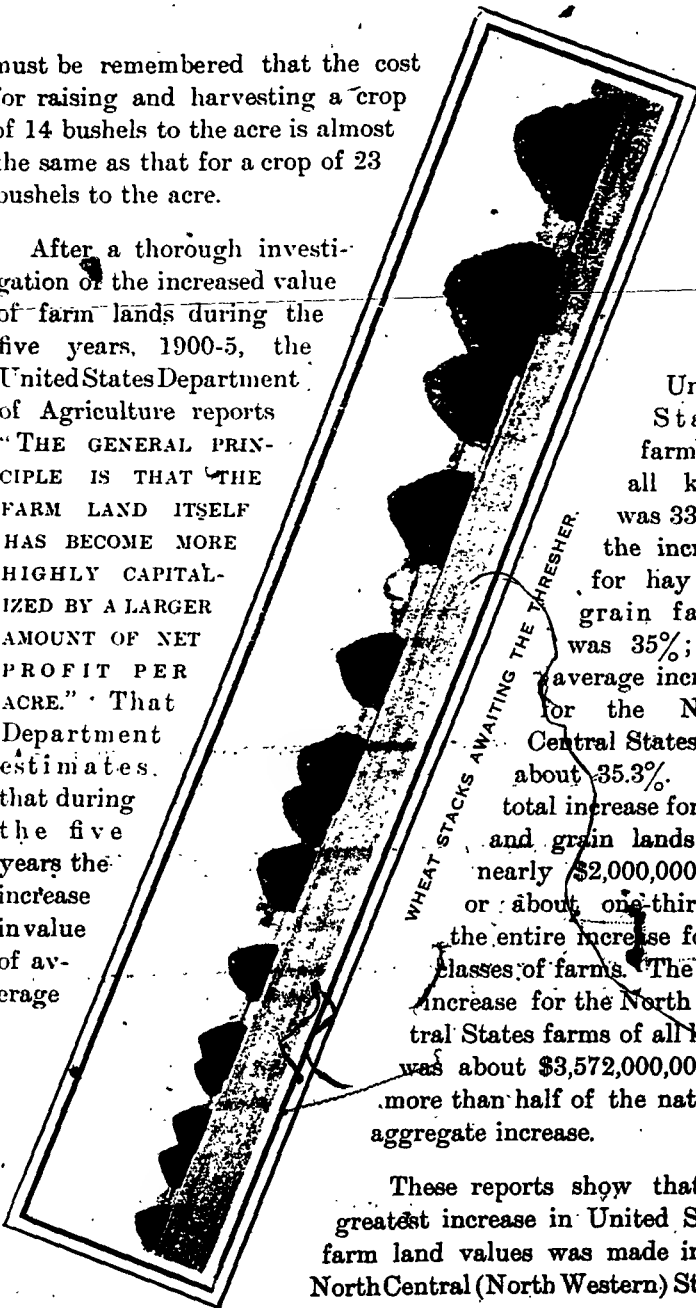

The values shown below, opposite the Provinces, are comparative values obtained by taking the average wheat land values of the seven Western States shown on page 10 and the average yield of wheat per acre as a basis. This shows conclusively that the present wheat land values in Western Canada are not by any means what the land is really worth for wheat growing purposes. The figures shown opposite the Western States were obtained from information issued by the United States Department of Agriculture, Washington, D. C.

	Average Yield of Wheat per acre	Proportional Wheat Land Values per acre
Average for 7 North Cent'l States, shown on page 10.....	14.15	Actual average value \$39.40
SASKATCHEWAN..	23.09	Would be worth..... 64.19
Alberta.....	21.46	Would be worth..... 59.66
Manitoba.....	21.07	Would be worth..... 58.57

Even the above figures do not fairly show the real intrinsic value of the average Western Canada wheat lands, as it

must be remembered that the cost for raising and harvesting a crop of 14 bushels to the acre is almost the same as that for a crop of 23 bushels to the acre.

After a thorough investigation of the increased value of farm lands during the five years, 1900-5, the United States Department of Agriculture reports "THE GENERAL PRINCIPLE IS THAT THE FARM LAND ITSELF HAS BECOME MORE HIGHLY CAPITALIZED BY A LARGER AMOUNT OF NET PROFIT PER ACRE." That Department estimates that during the five years the increase in value of average

WHEAT STACKS AWAITING THE THRESHER.

United States farms of all kinds was 33.5%; the increase for hay and grain farms was 35%; the average increase for the North Central States was about 35.3%. The total increase for hay and grain lands was nearly \$2,000,000,000, or about one-third of the entire increase for all classes of farms. The total increase for the North Central States farms of all kinds was about \$3,572,000,000, or more than half of the national aggregate increase.

These reports show that the greatest increase in United States farm land values was made in the North Central (North Western) States;

that hay and grain farms were second only to cotton farms in percentage of increase, and that the principal cause of the increase was a greater net profit per acre. The geographical position of Western Canada is as good as that of the North Western States; grain is the principal crop; and the net profit per acre far exceeds that of the States to the southeast. There is no good reason why Western Canada lands should not also increase in value. There are

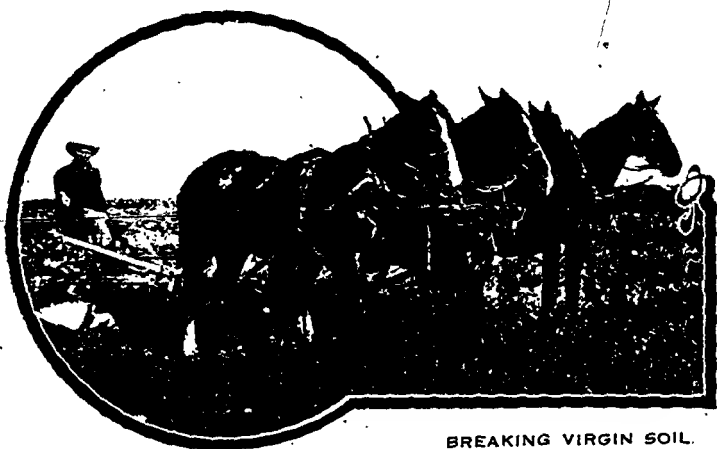

REAPING.

THIRTY GOOD REASONS

why Saskatchewan Wheat Belt Lands will in the very near future increase in value far beyond the present prices.

1. The homesteads in the Wheat Belt are nearly all gone.
2. The rapidly increasing number of desirable settlers.
3. Extensive Company and Government advertising stimulating increased immigration.

(George K. Holmes, of the United States Department of Agriculture, in speaking of the effects of immigration on United States farm lands during the years 1900-5, says: "The consequent pressure of new demand upon a fixed area increased the value per acre during five years often as much as 50% to 100%.")

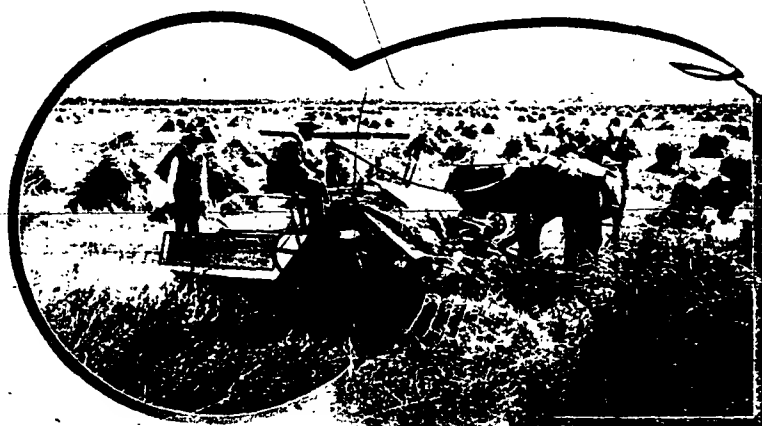

BREAKING VIRGIN SOIL.

4. The demand for farm lands is increasing.
5. They are the best wheat lands known.
6. It is the richest soil in the world.
7. The climate is ideal.
8. The topography is most desirable.
9. The high average yield.
10. A series of good crops.
11. The high price of wheat.
12. The demand for wheat.

(The Chief of Division of Foreign Markets of the United States Department of Agriculture, says: "The increasing demand of the world for wheat promises the wheat grower that he shall not again suffer from the consequences of over-production.")

13. The high prices of other farm products.
14. An improvement in fertility and productiveness of the land.
15. More intensive culture of crop.

HIS SECOND YEAR'S CROP

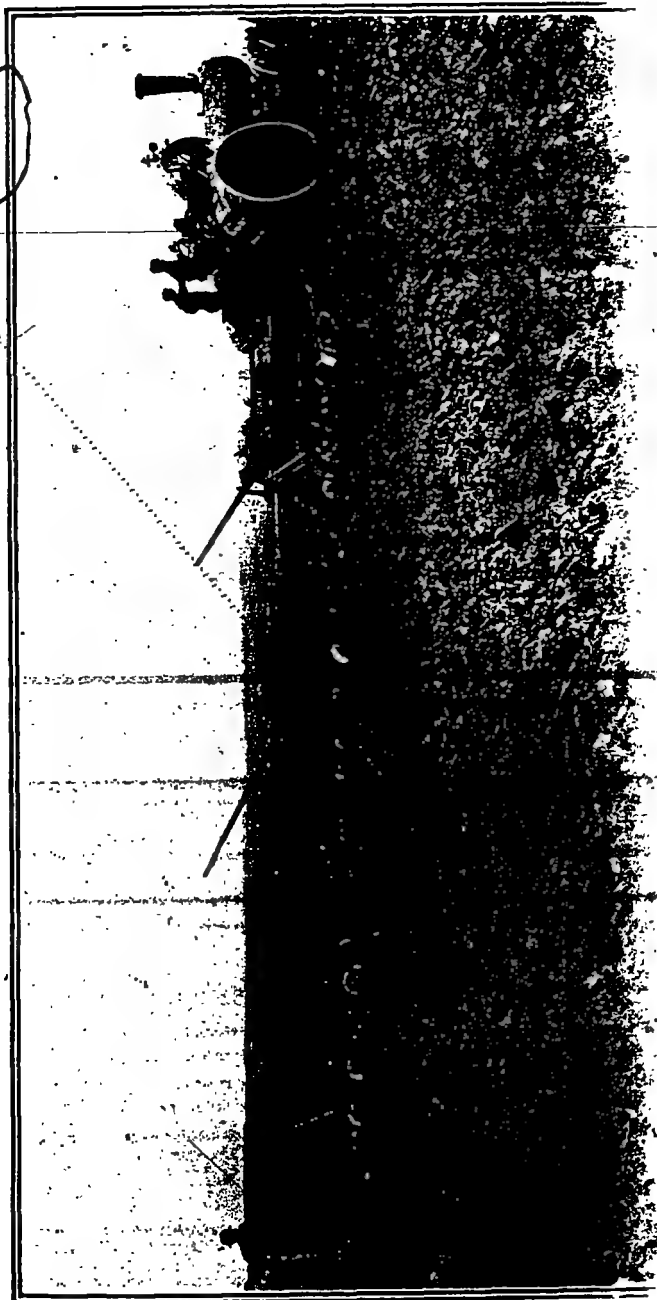

16. An improvement in cultural methods.
17. A better technical agricultural knowledge supplied by books, lectures, Government bulletins and experimental farms.
18. An increase of improvements (buildings, fences, etc.)
19. The employment of more improved implements and machinery.
20. Better applied labor.
21. Railway extensions and improved facilities of transportation.
22. New railway towns affording new local markets.
23. The proximity of all lands to railways.
24. Improved facilities for marketing the crops.
25. Construction of good roads; telegraph and telephone extensions.
26. Better markets and better business features of marketing products.

27. The excellent grain elevator service throughout the district.
28. The large milling companies in western grain centres.
29. Improved economic conditions; general prosperity.
30. The desire of prosperous farmers to enlarge their farms.

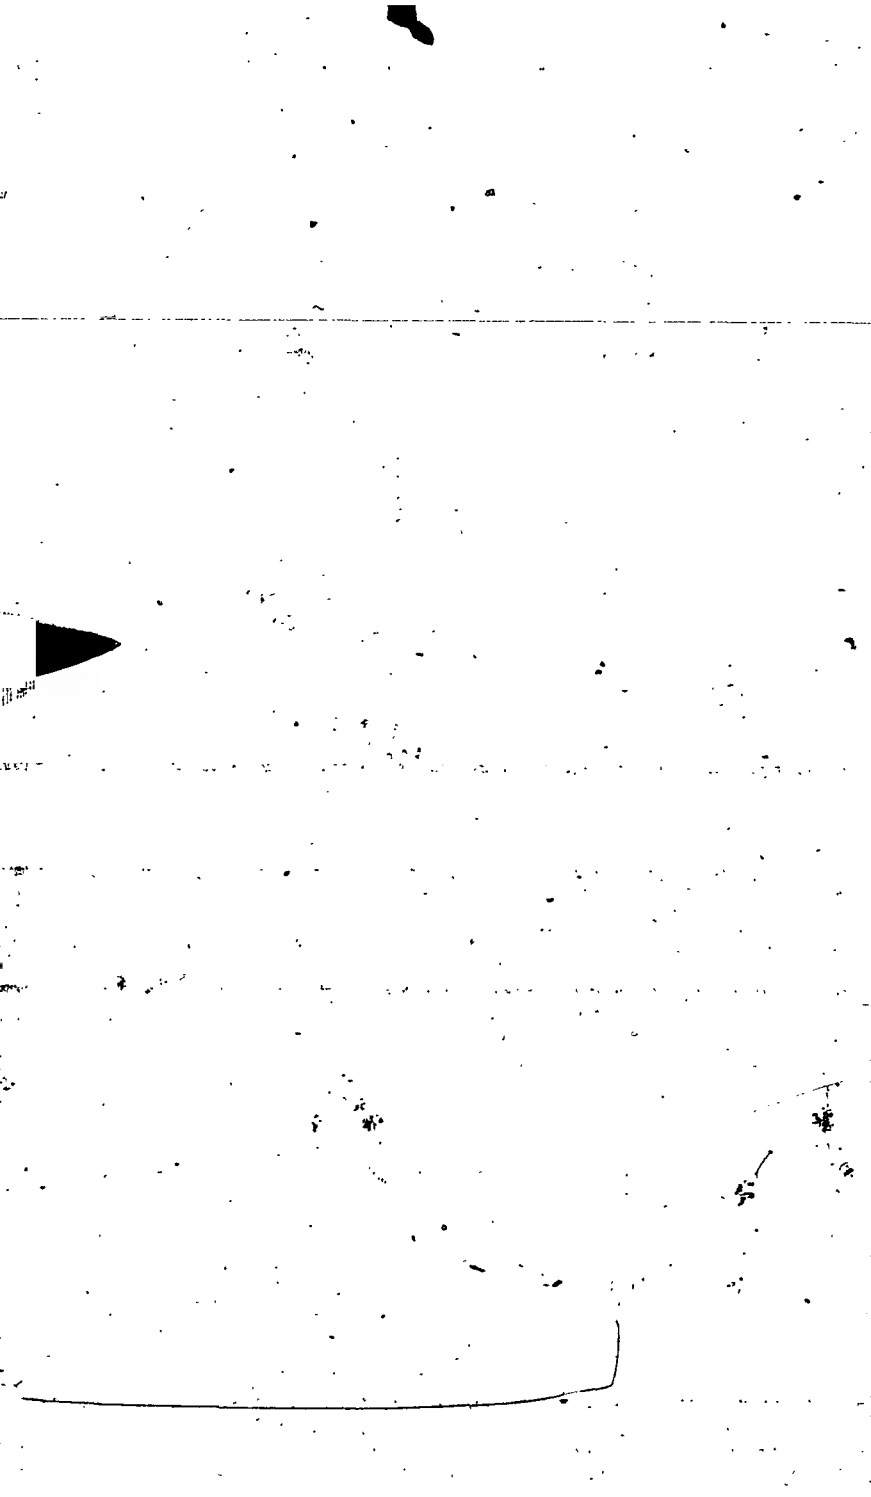

Extract from an interview with an Iowa farmer:—

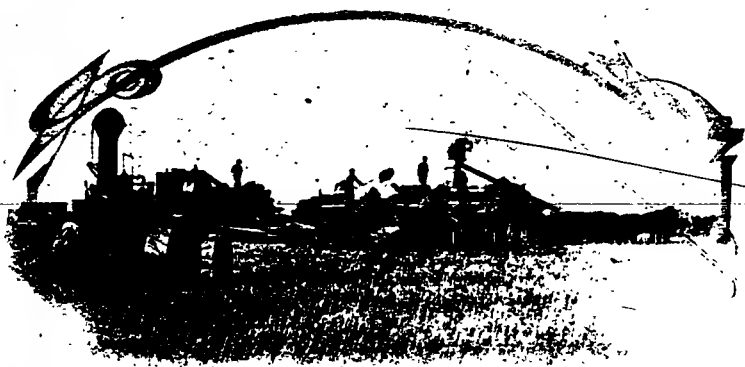

"Manitoba Free Press, May 25th, 1906. — Lands that to-day I see offered at \$12 per acre are intrinsically worth twice that amount when worked as farms. I should think that within five years you will find that all really good wild farm lands, which will produce grain and stock, will be worth \$30 an acre. There is no reason on earth why your lands here are not worth, for farming purposes, as much as our lands in Minnesota, the Dakotas, Iowa and Illinois, and there improved lands, not a bit better than yours, are worth nearer \$100 an acre than \$50. I have met a great crowd of people looking for homesteads, but good ones are very difficult to procure. The day of \$7 and \$8 land is gone, if my judgment is right, forever in this country. A friend of mine offered \$9 per acre for a block of land along the Grand Trunk Pacific in Saskatchewan, but did not get it, as the owners are retailing it rapidly at from \$12 to \$15 an acre."

The foregoing information regarding land values corroborates the opinion of land experts, that the time is not far off when the general price of good Saskatchewan farming lands near railways will be from \$20 to \$30 an acre.

20 TWENTIETH CENTURY METHODS OF CULTIVATION IN WESTERN CANADA. PLOWING WITH A STEAM ENGINE

HARVESTING.

RAILWAYS

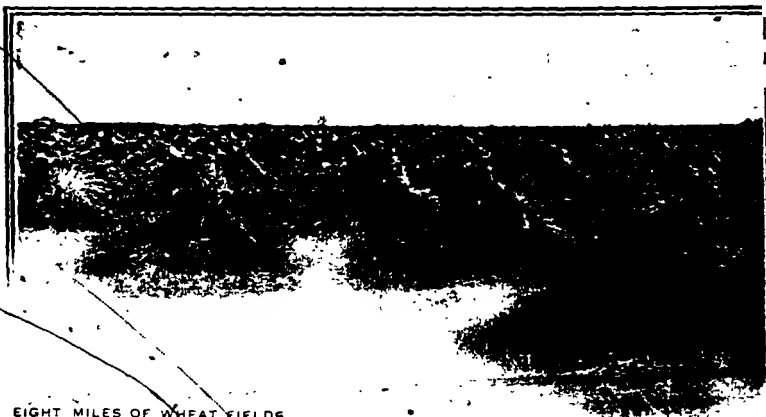

The three great railway systems, with their many branches under construction, will form a perfect network of railways traversing the Wheat Belt. The railways are following the settlers as fast as the rails can be laid. An idea can be had of the existing roads, the roads under construction, and the extensions for which charters have been issued, by referring to the company's map herewith. The information given thereon and in the following description regarding proposed lines and lines for which live charters are in existence, was obtained from the most reliable sources, and this company believes that most of them will eventually be built. However, it is not the intention to imply that the building of all these proposed and chartered lines is assured, or that the locations will be exactly as shown on the map.

CANADIAN PACIFIC LINES

The main line passes through Regina, about twenty-five miles to the south of the lands of The Saskatoon & Western Land Company, Limited.

The Pheasant Hills Branch (or, as many call it, the Kirkella Line) enters the lands of The Saskatoon & Western Land Company, Limited, in the southeast, runs directly west for about forty miles, turns north just east of Last Mountain Lake—running north about fifty miles—where it again turns west, passing directly through Saskatoon and on to Edmonton. This line is completed to Saskatoon, and serves about 166,000 acres of this company's lands in the Last Mountain district.

The extension of the Yorkton Line to Lanigan Junction, where it will meet the Pheasant Hills Line, will, when the latter

EIGHT MILES OF WHEAT FIELDS

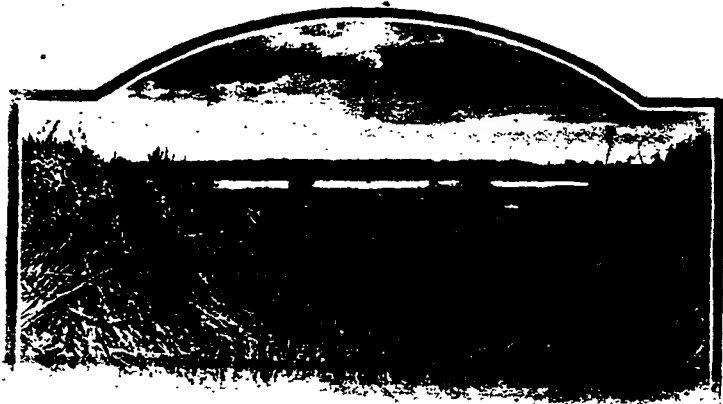

is completed, give direct connection between Winnipeg and Edmonton, via Saskatoon. This line will serve about 33,000 acres of the company's lands.

It is proposed to extend the Yorkton Line to Prince Albert. This will be a great aid to the Shellbrook country, and other lands in the Prince Albert district, giving them a direct line to Winnipeg and other eastern grain centres.

The Moose Jaw Branch, a good part of which is under construction, will run north and northwest from Moose Jaw. The

route plan shows that it will pass just east of The Elbow of the South Saskatchewan River, and it is proposed to continue it on north to a point on the line from Saskatoon to Edmonton. This branch, when completed, will give a much improved service to about 69,000 acres of the lands of The Saskatoon & Western Land Company, Limited.

The line from Regina to Bulyea on the Pheasant Hills Branch is now under construction. This will greatly improve the service to about 80,000 acres of the Company's lands, and will give all the territory east of Last Mountain Lake direct

AN OAT LADEN PASTURE. SLOPING TO THE LOWLANDS THAT FRINGE THE SASKATCHEWAN RIVER.

connection with Regina, the south and the west. It will also facilitate the shipping to this district of coal and lumber from the west.

The C. P. R. also propose building a line from Craven to Prince Albert, skirting the west shore of Last Mountain Lake, thence northwesterly to Saskatoon, thence about midway between the C. N. R. and the North Saskatchewan, to Prince

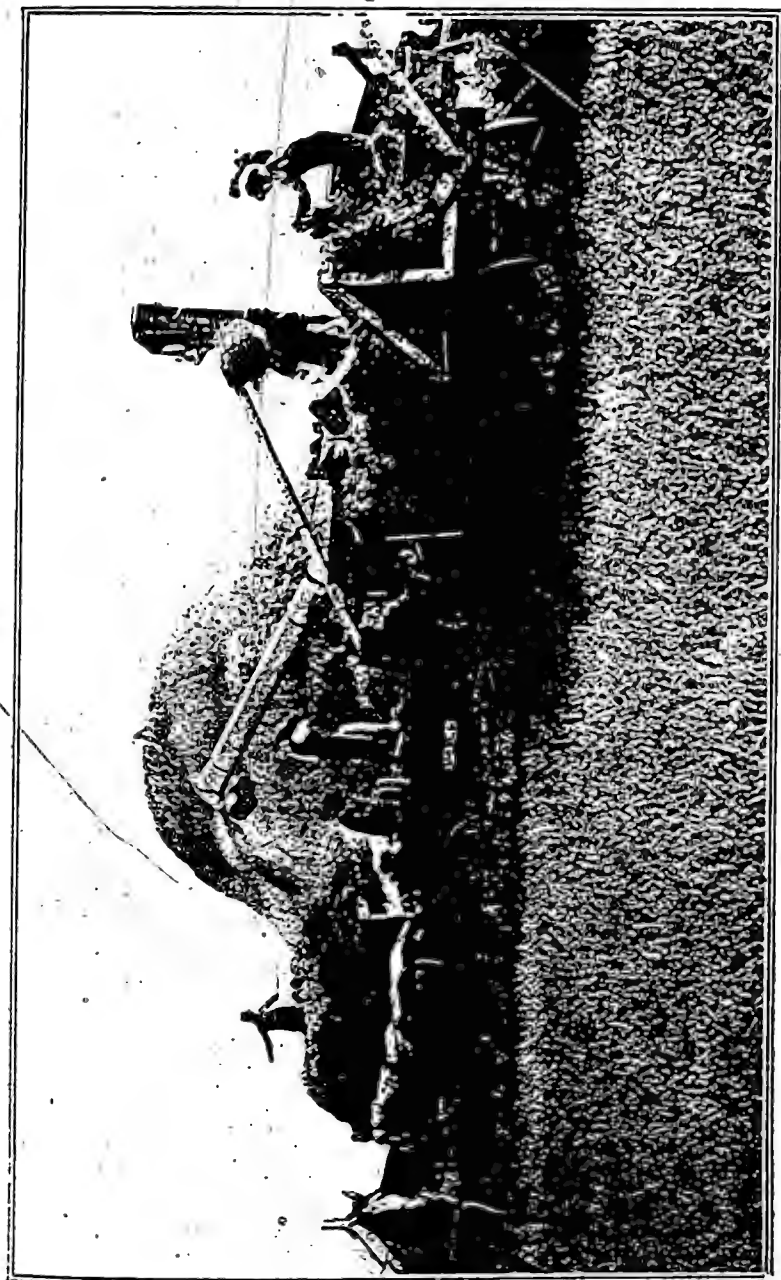

A DISTANT VIEW OF THE CITY OF INDIAN HEAD, SASK.

Albert. This line would give greatly improved service to about 30,000 acres of The S. & W. L. Co.'s lands.

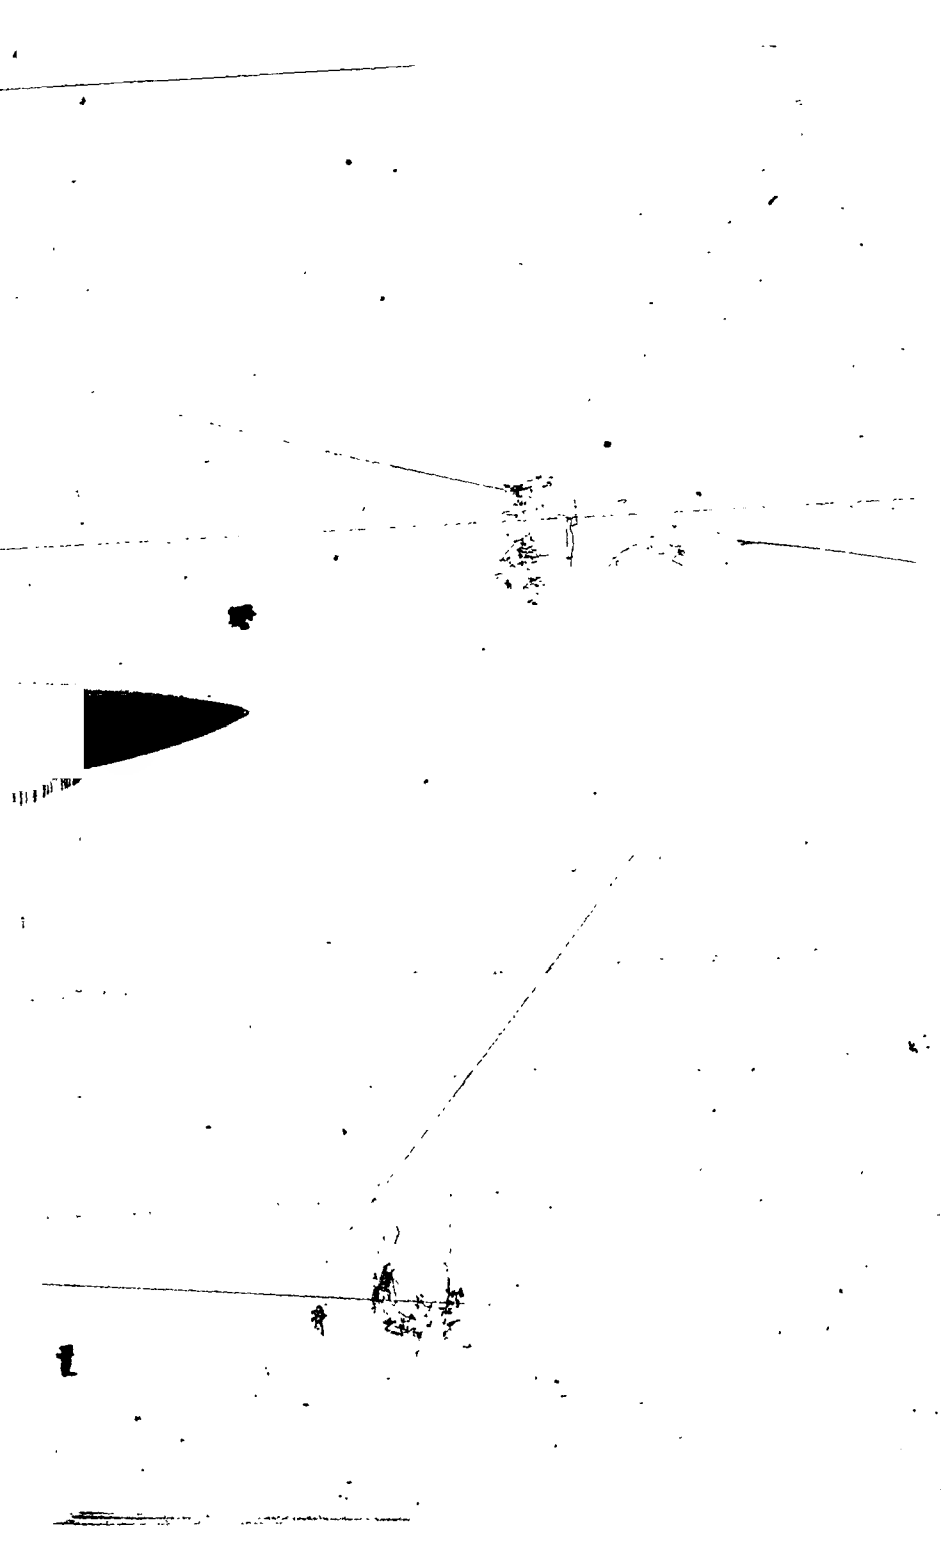

CANADIAN NORTHERN LINES.

The lines of the C. N. R., now in operation, give good service to about 152,000 acres of the lands of the Saskatoon & Western Land Company, Limited, as follows:—Along the main line, 26,000 acres; along the Regina-Prince Albert line (formerly the Qu'Appelle Long Lake & Saskatchewan Railroad) 126,000 acres. Prince Albert is at present the terminus of both the Regina-Prince Albert line and the northern route of the C. N. R., but a bridge over the North Saskatchewan is now under construction, and the C. N. R. holds a charter, and it is understood will soon build its line through from there to North Battleford. This, together with the proposed branch line of the G. T. P., would open up the famous Shellbrook and Blaine Lake districts, in which this company has 36,000 acres.

The C. N. R. also have under construction a line west of the south Saskatchewan—running north and south, and connecting with their other lines and proposed lines—which, when completed, will serve about 19,000 acres of the lands of The Saskatoon & Western Land Company, Limited.

A FAMILIAR SCENE: THRESHING AND CLEANING.

The C. N. R. are extending their southern line westward. In the near future their trains will be running to and from Regina, where connection will be made with their line to Prince Albert. They also hold a charter to build west from Regina, running considerably north of the C. P. R. main line and crossing the South Saskatchewan river a few miles southwest of The Elbow. When this line is built west of Regina, it will greatly improve the service to about 26,000 acres of this Company's lands.

A line beginning at or near Davidson, on the Regina-Prince

INDIAN HEAD ELEVATORS WHICH RECEIVE ANNUALLY COUNTLESS TONS OF WHEAT RAISED ON THE SASKATCHEWAN PLAINS

Albert branch, and running westward, is also proposed. This would greatly improve the service to about 40,000 acres.

Should the Hudson Bay route ever prove feasible for the handling of ocean traffic the lands of The Saskatoon & Western Land Company, Limited, are admirably situate, as the C. N. R. and other lines serving practically the entire area will have direct connection with Fort Churchill via the C. N. R. northern route, as the C. N. R. have now under construction a line from Etoimami to The

Pas, and it is understood this line will be extended through to Fort Churchill.

Two lines have been chartered from a point in the Carrot River Valley running southwest; one through Humboldt and Saskatoon and on to Calgary; the other to Regina, passing through the Last Mountain Lake district somewhat east of the Pheasant Hills branch of the C. P. R. When built, these lines will greatly improve the service to about 170,000 acres of this Company's lands.

EXPERIMENTAL FARM
NEAR INDIAN HEAD, SASK.

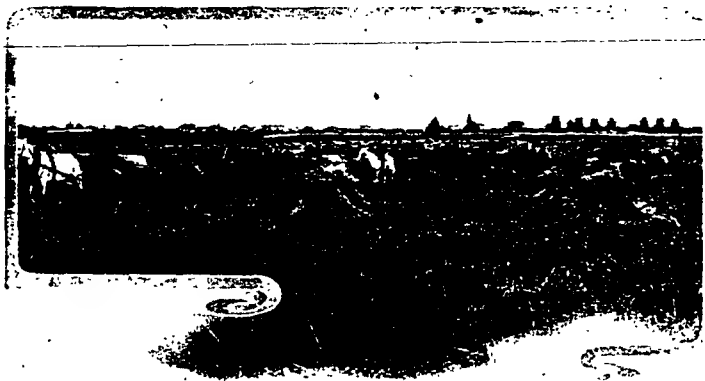

GRAND TRUNK PACIFIC LINES

Along this great trunk line railway, which will extend from Moncton, N. B., to Prince Rupert, B. C., The Saskatoon & Western Land Company, Limited, has about 66,000 acres of land in the very heart of the Saskatchewan Wheat Belt.

A line from a point on the main line, south of Big Quill Lake, northwest to Prince Albert, is proposed. From Prince Albert to North Battleford it is also proposed to build a line to the south of the C. N. R. When these lines are built, they will serve

about 50,000 acres of this Company's lands, of which 30,000 acres are in the famous Shellbrook and Blaine Lake districts, and will give the entire country around Prince Albert additional connections with the east and west.

There is a charter for an air line through Regina and directly west. If this line is built, it will pass just south of the Company's lands.

THE FIRST STEP IN THE PREPARATION TO DELIVER TO THE ELEVATORS
IN THE DISTANCE

GREAT NORTHERN LINES

The Great Northern Railway is at present building some branch lines in Western Canada, and there already has been much talk of a transcontinental line through Canada. In an interview, Mr. Hill, the President, said:—

“We propose to cross the Canadian Pacific Railway, and run a line considerably north of it, where the country is A No. 1, and where the local traffic is sure to be heavy.”
—*St. John Telegraph.*

Should this be true, this line would be obliged to traverse the lands of The Saskatoon & Western Land Company, Limited, and would afford additional service to many thousands of acres.

CITIES AND TOWNS.

REGINA.

About twenty-five miles to the south of the Company's lands is the City of Regina, the capital of Saskatchewan, and the headquarters of the Royal North-West Mounted Police. A

A RESULT OF A FEW YEARS WORK IN
WESTERN CANADA

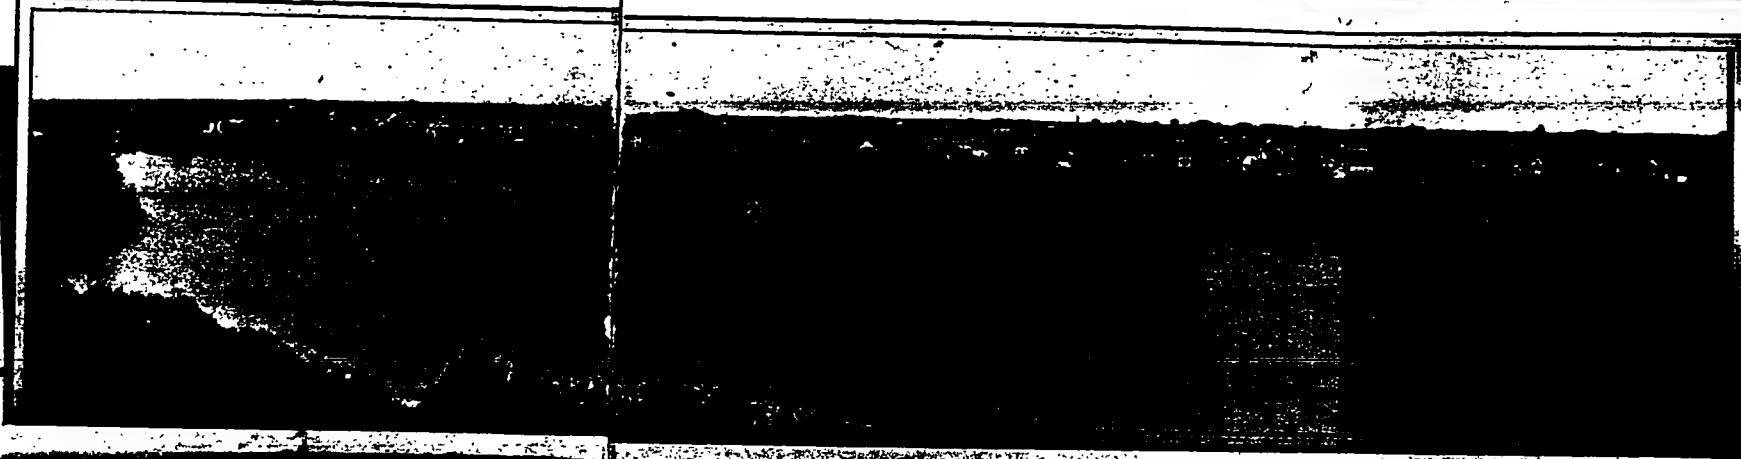

few years ago Regina was known as the "muddy little place;" today it is a

hustling, prosperous, rapidly growing city of ten thousand people; a conspicuous example of western progress and development. The rapid commercial development is based on the fertility and productiveness of the surrounding country. The population has quadrupled in four years, and property is changing hands at prices that are almost unbelievable. Regina is the wealthiest municipal corporation in Canada. Many public improvements are under way, and every effort is being made towards a most beautiful city. An electric light plant costing \$100,000 has been installed by the city, and \$350,000 has been expended on waterworks and sewers. The modern streets and sidewalks, and the fine churches, civic buildings and schools are a credit to the city. The following are some of the amounts being expended, or about to be expended, for improvements:—

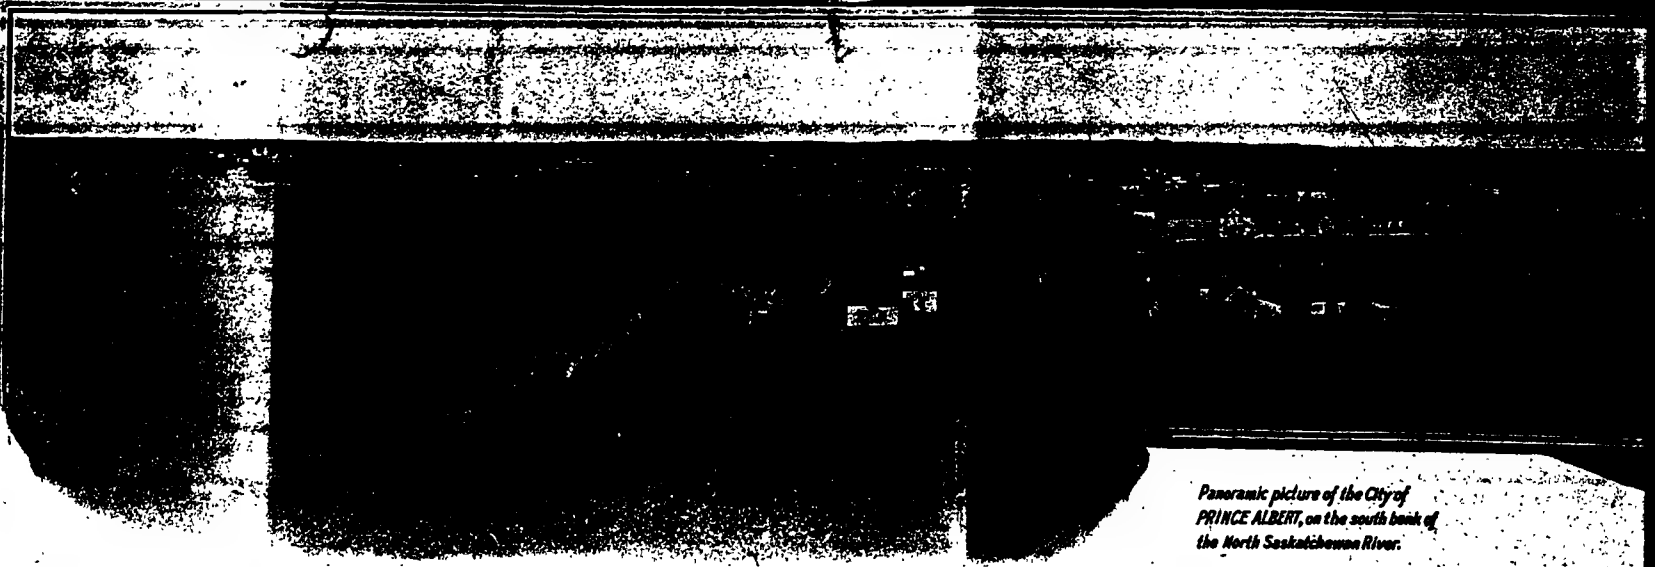

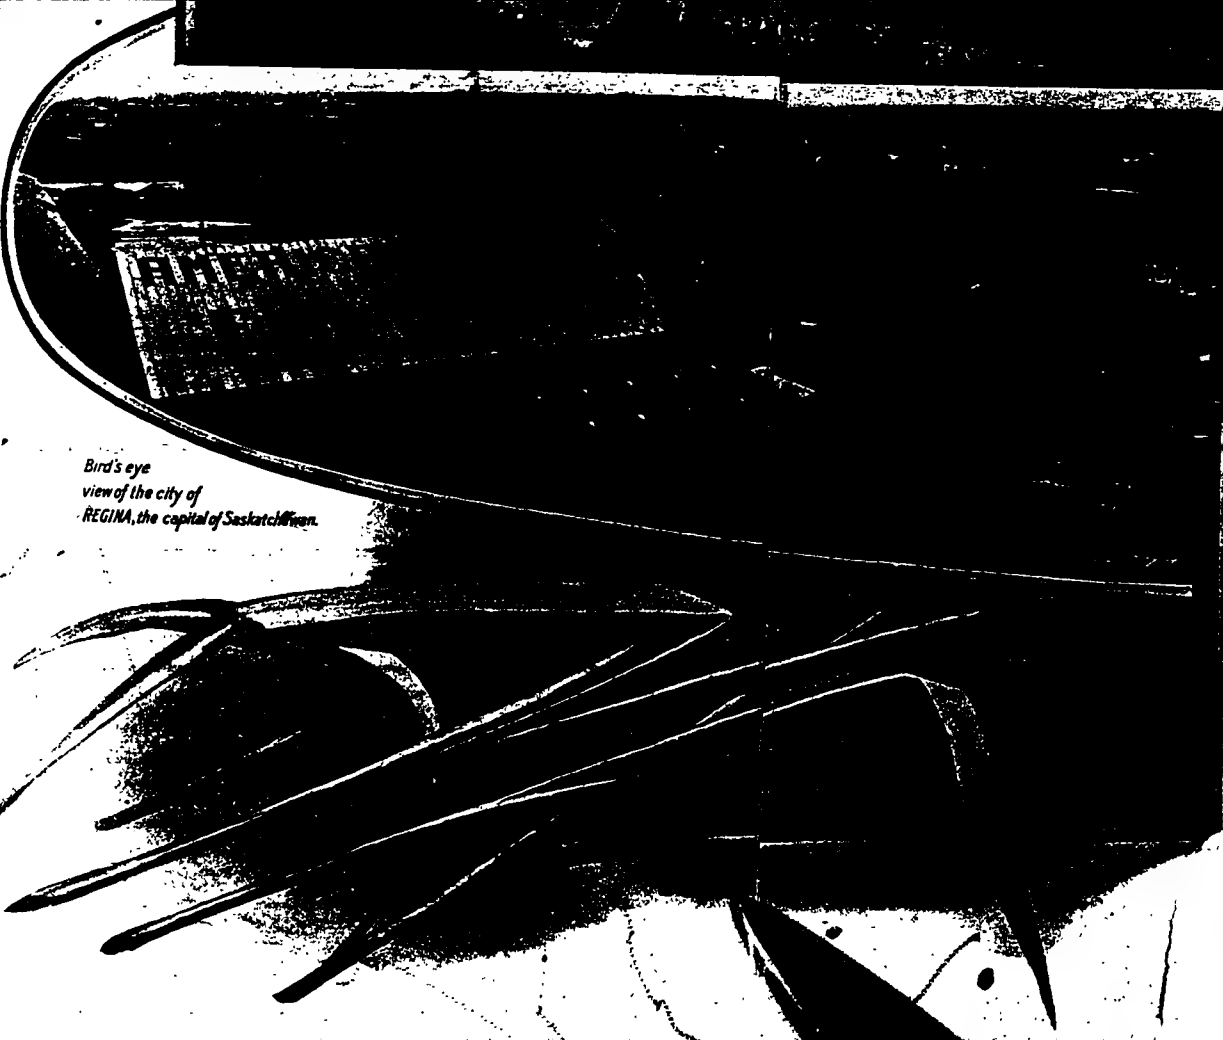

Street Pavements and Sidewalks,	\$450,000
New City Hall,	140,000
Fire Protection,	40,000
Water Works,	50,000
Street Grading, Sewerage System, etc. (about)	70,000
Post Office and Customs House,	250,000
Parliament Buildings,	400,000

TOTAL (about)..... \$1,400,000

PRINCE ALBERT, on the south bank of
the North Saskatchewan River.*

Regina is the central distributing point for a vast fertile district in Southern Saskatchewan, and is the threshold of the country to the north. A number of distributing depots and manufacturing enterprises have been established there, and a large wholesale trade has

OLD AND NEW HOMESTEADS IN
SASKATCHEWAN

been developed. It is from there that many of the settlers scatter over the Saskatchewan plains. The city is on the main line of the Canadian Pacific Railway, and that Company has a branch extending southeast, and, with the completion of the line to Bulyea, another large area will have close connection with the capital. The Canadian Northern Railway will enter from the southeast, and its Regina-Prince Albert branch runs north. The Grand Trunk Pacific is soon to build a branch line into the city.

SASKATOON.

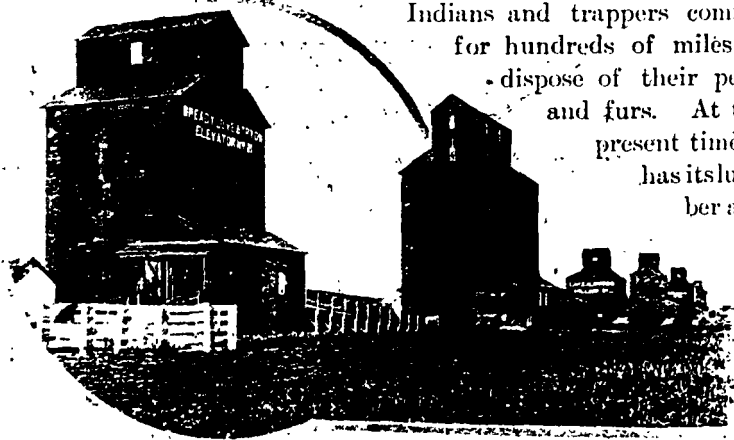

Three years ago Saskatoon was a small village, but during this short period it has developed into a wide-awake city, "full of ambition and railways," with a population of from four to five thousand people, and with every evidence of a continued rapid and healthy growth. It has its electric light and sewerage system, several banks, numerous thriving business houses, and many other heavy investments of capital. A glance at a map of Saskatchewan will show the position of Saskatoon to be a

very advantageous one. It is the distributing point for a large and rich surrounding country, standing about the middle of the hard Wheat Belt. It is located on the west bank of the South Saskatchewan River, and it is practically the junction point of the Grand Trunk Pacific main line, the Canadian Pacific Pheasant Hills branch, and the Canadian Northern Regina-Prince Albert branch (formerly the Qu'Appelle, Long Lake and Saskatchewan Railroad). Other branch lines will in all probability enter the city in the very near future.

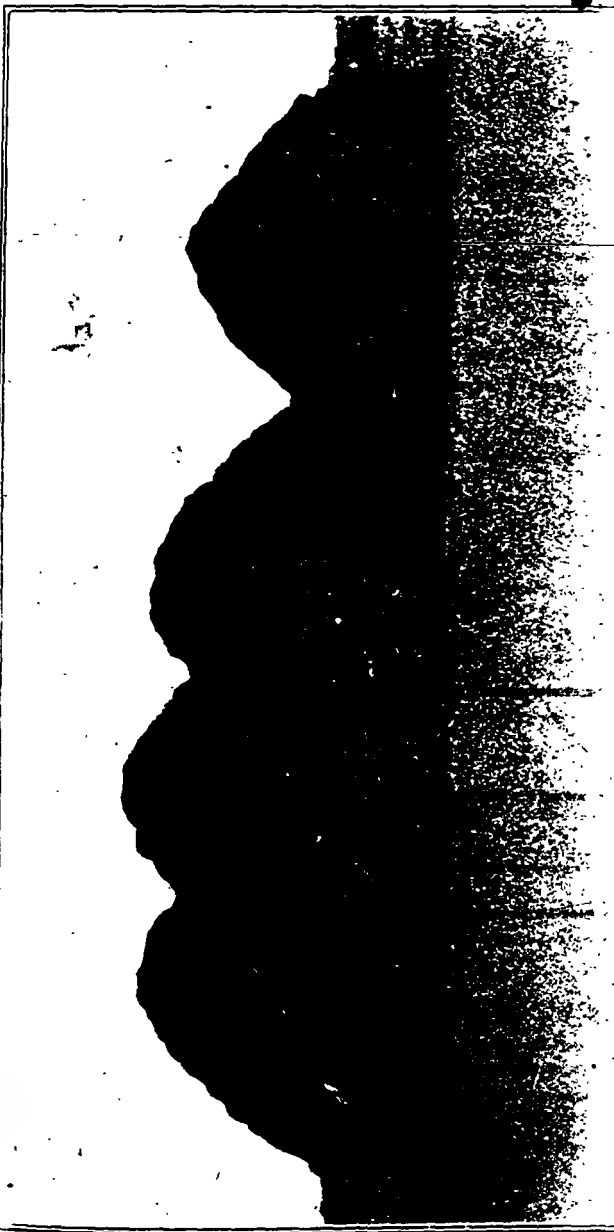

PRINCE ALBERT

Prince Albert, situated on the south bank of the North Saskatchewan River, is the terminus of the Canadian Northern Regina-Prince Albert branch and that company's northern line. The Canadian Northern intend building southwest to North Battleford, and the Grand Trunk Pacific and Canadian Pacific propose entering the city in the near future. Prince Albert differs from many of the other western cities, as it is what one might call "a natural city," having been in existence for many years prior to the building of its railways. At that time the city was a

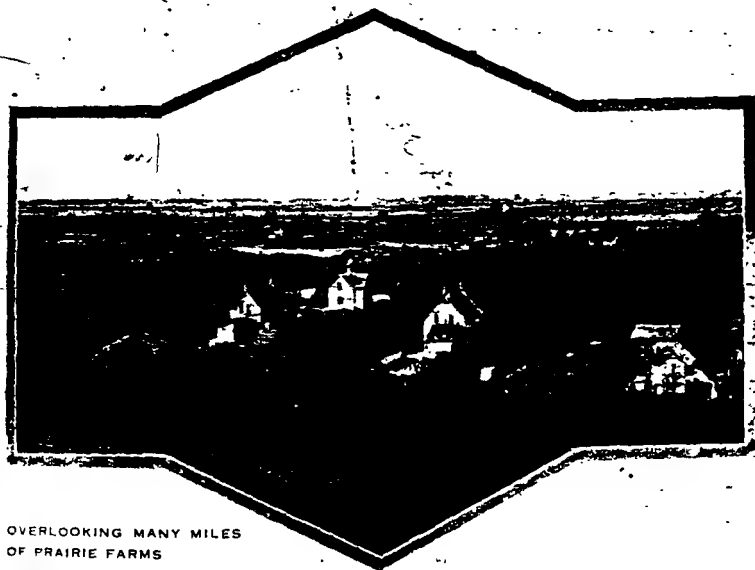

centre for the fur trade, the Indians and trappers coming for hundreds of miles to dispose of their pelts and furs. At the present time it has its lumber and

WHEAT ELEVATORS.

THOUSANDS UPON THOUSANDS OF THESE SENTINELS DOT THE WESTERN PLAINS, GUARDING AGAINST WANT.

OVERLOOKING MANY MILES
OF PRAIRIE FARMS

flour mills, hotels, churches, schools and many business blocks. A large business is done in lumber, over one million dollars' worth going out each year. The cut of lumber for 1907 is estimated at 65,000,000 feet. The surrounding country is rich in Tamarac, Jack Pine, Spruce and Poplar. The supply of the latter is practically unlimited. The Secretary of the Board of Trade states that brick yards and pulp and paper mills will soon be located in Prince Albert. The three flour mills have a daily capacity of 475 barrels. The problem of harnessing the water power of the Saskatchewan or Shell Rivers is now under consideration. The city has a population of about five or six thousand, and is growing rapidly. It has many modern improvements in the way of water system, electric light, sewerage system, etc., and everything points to a rapid development in many other interests.

OTHER TOWNS.

Many other prosperous towns have sprung up from little villages and hamlets, and all through the Wheat Belt are such towns

as Davidson, Dundurn, Hanley, Lumsden, Rosthern, Humboldt, Nokomis, Lanigan Junction, Strassburg, Vonda, Craik, Girvin, Warman, Duck Lake, Aberdeen, Bladworth, Kenaston, and others with their grain elevators, hotels, business blocks, churches and schools; and most of them have one or more banks. Each town is the centre of a rapidly developing surrounding territory, and wheat fields can be seen for many miles in every direction.

A NATURAL GROWTH.

The Deputy Minister of the Interior, in his report for the fiscal year 1905-6, says:—

"The year has been a record one in the history of the Department, both as regards immigrant arrivals and the granting of free homestead entries. And the area of land disposed of by the various land companies holding grants from the Crown was nearly double the acreage sold during the year 1904-5."

"From a public standpoint, these results are certainly very gratifying for nothing, at the present stage of our national life, could contribute more largely to the extension of the trade and commerce of Canada, the development of its varied resources, and the consequent general prosperity of the country, than the settlement, by a suitable class of agriculturists, of the vast areas of arable land composing the Western Provinces."

The Inspector of Dominion Lands Agencies, in reporting for the year 1905-6, says:—

"The past year has, in respect to progress, development and general prosperity, been the banner year for the Canadian West. In the matter of homesteading and settling upon the lands, this also applies. The new settlers, too, are of the enterprising, industrious class, and are fast converting the bald prairies into waving grain fields and thrifty, well-stocked farms. Land values have advanced materially, especially in newly settled districts and along the lines of railway."

WHEAT ELEVATORS IN THE DISTANCE. ROLLING PLAINS OF SASKATCHEWAN

Edward O'Kelly, Agent of the Dominion Government in the Emerald Isle, says:—

"I do not like to say that the West is booming, as that is a word which I would apply rather to a mining camp than to an agricultural country. A boom disappears, but the wealth which is created in an agricultural community continues from year to year without cessation."

SASKATCHEWAN WHEAT LANDS AS AN INVESTMENT.

The steady, rapid and healthy growth of the Saskatchewan Wheat Belt, the enormous crops, and the increasing railway facilities guarantee a safe and profitable investment. It is now, and for many years will be, the one best place to buy good farm lands at reasonable prices.

It is there that the reason for an increased population is a substantial one.

It is there that is found the absolute security of—
LAND and WHEAT—the best wheat lands and the finest hard wheat in the world.

It is there that the railways are at present building more actively than in any other part of Canada.

It is there that the best class of farmers are going in large numbers.

THAT is the **PLACE** to invest, and the **TIME** to invest is before they **ALL** get there.

LETTERS FROM LAND EXAMINERS.

WINNIPEG, December 19, 1906.

The Saskatoon & Western Land Company, Ltd., Montreal, Canada.

DEAR SIRs,—I assisted in the selection of the lands for your Company. I spent several months on the work last summer and went over a large territory, and the lands finally selected were the best lands available in the large grant set aside for the selection. I was careful to select no land where the soil was not good or where the surface was too rough and hilly. The surface generally varies from undulating to rolling, and the greater portion is open prairie free from timber or brush, but a portion of the land selected has patches of small poplar, which speaking generally do not cover more than 15% to 20% of the total surface. In the districts where the selections were made the lands open for free homesteads were practically all taken up and mostly occupied by homesteaders, and some of the odd numbered sections were also settled on. I found that good water was obtainable in wells in all districts.

Yours truly,

E. A. BREDIN.

WINNIPEG, December 19, 1906.

The Saskatoon & Western Land Company, Ltd., Montreal, Canada.

DEAR SIRs,—The lands I assisted in selecting for your Company last summer were the best available in the territory gone over. The lands in the Humbolt and Prince Albert country might be described as park-like, and the remaining land as undulating to rolling prairie. The lands open for homestead were practically all taken up and mostly occupied. I was careful to select only lands where the soil, both surface and sub-soil, was of good quality, varying from black and sandy loam to clay loam on clay and sandy clay sub-soil.

Yours truly,

JAMES DOWKER.

COUNCIL BLUFFS, Iowa, January 19, 1907.

The Saskatoon & Western Land Company, Ltd., Montreal, Canada.

GENTLEMEN,—The lands which I selected for your Company last summer were all good first-class farm lands, the best it was possible to find in the large area which I covered. The surface varies from level to gently rolling, and on some pieces there is a small amount of poplar and on some a small good lake, which I consider a great advantage to the prospective settler. The soil runs from black loam to chocolate loam, both on good clay sub-soil. I found, in the territory I covered, all homesteads taken up and a good class of farmers settled on same; also a large number of odd numbered sections have been improved by good farmers.

Yours very truly,

WILLIAM ARND.

COUNCIL BLUFFS, Iowa, January 19, 1907.

The Saskatoon & Western Land Company, Ltd., Montreal, Canada.

GENTLEMEN,—The lands I assisted in selecting for your Company last summer were the very best it was possible for me to find in the large territory I had to cover. I accepted nothing where the character of the soil and the lay of the surface of the land did not come up to what I considered necessary for first-class farming property. The surface of all lands selected by me varies from level to gently undulating and the soil from black loam to chocolate with good clay sub-soil under all.

Yours very truly,

P. J. KORTH.

FOREST CITY, Iowa. January 19, 1907.

The Saskatoon & Western Land Company, Ltd., Montreal, Canada.

GENTLEMEN.—The lands which I selected for your Company last summer were all what I considered good farm land, both as to lay of surface and character of soil. In fact are what I would have been glad to take myself as a personal investment both as to the character of land and situation inasmuch as practically all of the homesteads in this section are taken up and the majority of them settled on and partially improved. In all localities I found it possible to secure good water at a reasonable depth and also found all the settlers contented and very enthusiastic over the future of their country.

Yours very truly,

MATT CRAWFORD.

WALHALLA, North Dakota, and DAVIDSON, Sask.,
January 19, 1907.

The Saskatoon & Western Land Company, Ltd., Montreal, Canada.

GENTLEMEN. The land which I selected for your Company last spring was of the very best lying within the territory covered, which is saying a great deal, as these districts are famed all over Western Canada and the United States as being in the very centre of the great wheat growing belt. The surface of the land is gently undulating, which is considered best for farming purposes, some of it, however, being level. The soil is black loam and clay loam with good deep clay sub-soil.

The adjoining homestead sections are all taken up by a good class of farmers and many of the odd numbered sections also settled on which is a great advantage as new settlers going in will have close neighbors.

Yours very truly,

H. H. LEE.
